[REDACTED] X3273, Room 2061 "J", inquired as to the existence of a statute providing that fiscal officers of the U. S. Government are charged with the responsibility that Government functions are performed in the most economical manner. I believe the thought behind this request to the statutory citation is to authorize the storage of household goods and effects in non-emergency area assignments where it can be established that the cost of storage over the period of the assignment is substantially less than the cost of transportation to and from the post of assignment. Please check.
